The goal will be to develop a prototype for an existing ICE model. Widgets will be developed in Javascript, according to an API to control their visual appearance and behaviour. For example, a widget representing a Menu will support setting up the options in the menu and their visual style (e.g., color, enabled status). The widgets to implement will be selected as needed to allow for the prototype's development.

3. BRIEF PRESENTATION OF THE WORK PROGRAMME AND TRAINING:

- development of a survey on tools for modelling, analysis and/or prototyping of user interfaces;
- study of the PVSio-web tool;
- definition of a set of case studies, of increasing complexity, to be used to drive the work;
- analysis and development of the prototypes (and corresponding widgets) for each case study;
- writing of the fellowship activity report.
