Recently, several modifications were proposed to this protocol for additional security, but it is not clear what is the performance/security tradeoff of these modifications.

The goal of this project is to develop an implementation of FIDO2 that permits assessing these tradeoffs and to create an open-source library that offers all variants of the protocol.

3. BRIEF PRESENTATION OF THE WORK PROGRAMME AND TRAINING:

- Analysis of the FIDO2 protocol;
- Development of a first prototype in a low level language, e.g., C or Jasmin;
- Development of alternative versions of the protocol;
- Performance analysis.

The awarding of the fellowship is dependent on the applicants' enrolment in study cycle or non-award courses of Higher Education Institutions.
