### 2. OBJECTIVES:

This grant is provided in the scope of the project Aliança para a Transição Energética (Alliance for the Energy Transition) where a multi-tenant, cloud-based solution to enable an integrated set of cross-domain, interoperable digital services with data from several domains will be design, while allowing a simple instantiation for distinct stakeholders along the energy value-chain.

In this scope, Edge, Fog and Cloud computing data management systems are particularly relevant, but they often provide a heterogeneous evaluation that makes a fair comparison impossible. This grant will focus on the need to design and develop a benchmarking system able to provide a comparable performance result in that scenario. It will conduct a state-of-the-art analysis, design, and specify a benchmarking system to assess edge-cloud data management systems.
