

CALL FOR GRANT APPLICATIONS (AE2025-0328)

INESC TEC is now accepting grant applications to award 1 Research Grant (BI) on the scope A-IQ Ready with reference 101096658 funded by the European Commission under the Horizon Europe program for the period 2021-2027.

1. GRANT DESCRIPTION

Type of grant: Research Grant (BI)

General scientific area: ENGINEERING, COMPUTER SCIENCE

Scientific subarea: Systems design, Informatics

Area of Work: Computing, Electronics and Digital Systems

Grant duration: 3 months, starting on 2025-09-01, with the possibility of being renewed until the end of the project.

Scientific advisor: João Bispo

Workplace: INESC TEC, Porto, Portugal

Maintenance stipend: € 1040.98, [according to the table of monthly maintenance stipend for FCT grants](#), paid via bank transfer. Grant holders may be awarded potential supplements, according to a quarterly evaluation process (Articles 19, 21 and 22 of the [Regulations for Grants of INESC TEC](#) and Annex II), up to a maximum limit of 50% of the monthly maintenance stipend.

INESC TEC supports costs with registration, enrolment or tuition fees, during the grant duration, under the terms established in the internal document: "[Payment of Tuition fees to grant holders](#)".

The grant holder will benefit from health insurance, supported by INESC TEC.

2. OBJECTIVES:

RISC-V processors with dedicated accelerators are promising for edge computing. CGRAs stand out as one of these architectures, but their use is limited by the difficulty of compiling workloads properly. ONNX, being a standard for AI models, is a natural source of workloads, but its representation is not directly compatible with mapping tools for CGRAs. These require graphs with more explicitly exposed computation (e.g., loops, scalar operations). This grant aims to bridge this gap by evolving an existing tool to transform ONNX into mappable graphs. Concrete objectives:

- Consolidate and extend an existing tool, onnx-flow, to transform ONNX models into data flow graphs (DFG) suitable for mapping onto CGRA accelerators;
- Writing a co-authored scientific article to disseminate the results obtained.

3. BRIEF PRESENTATION OF THE WORK PROGRAMME AND TRAINING:

- Review the current state of the onnx-flow tool, the ONNX format, and mapping tools for CGRA;
- Implement new transformations that expose explicit scalar computation and reduce the complexity of composite nodes (e.g., MatMul, Conv, ReduceSum), with a focus on merging, removing redundant loops and coalescing dimensions;
- Create realistic examples of transformed ONNX models, and validate the mappability of the generated graphs with existing mapping tools;
- Collaboration in the writing of a scientific article to disseminate the results.

4. REQUIRED PROFILE:

Admission requirements:

- Degree or enrollment in a master's degree in electrical engineering, computer science, or a related field;
The awarding of the fellowship is dependent on the applicants' enrolment in study cycle or non-award courses of Higher Education Institutions.

Preference factors:

- Experience with structuring or manipulating graphs (e.g., ASTs, DFGs)
- Interest in compilers and/or familiarity with the ONNX format
- Fluent in Portuguese and English (written and spoken)

Minimum requirements:

- Programming experience (ideally JS/TS)
- Fluency in English (written and spoken)

5. EVALUATION OF APPLICATIONS AND SELECTION PROCESS:

Selection criteria and corresponding valuation: the first phase comprises the Academic Evaluation (AC), based on the criteria referred to in Article 12 of the [Regulations for Grants of INESC TEC](#), while the second phase comprehends the Individual Interview (EI). All factors are evaluated on a scale of 0 to 100, taking into account the applicants' merit, suitability and conformity with the preference factors.

The weight of the AC factors are as follows: Academic Qualifications (FA, 40%), Scientific Publications (PC, 10%), Experience (EX, 40%) and Motivation Letter (CM, 10%).

Candidates who score less than 50 points in the AC average will be considered excluded on absolute merit. The top five candidates approved on absolute merit will be qualified for the individual interview. The Final Grade (CF) is obtained by the weighted average of AC (70%) and EI (30%).

DISABILITY INCENTIVE

Candidates who present a degree of disability equal to or greater than 90% will benefit from an incentive (20) in the score of the CV Assessment.

Candidates who present a degree of disability equal to or greater than 60% and less than 90% will also benefit from an incentive (10) in the score of the CV Assessment.

Said score may, in these cases, exceed 100 points.

Candidates must demonstrate the degree of disability during the application, namely through the submission of the Multi-Purpose Medical Certificate of Disability, issued in accordance with Decree-Law no. 202/96, of October 23 - currently in effect.

Candidates must declare, in the application form, the type of disability used throughout the selection process, in order to proceed with the required adaptations.

The Selection Jury is composed of the following members:

- President of the Jury: Nuno Miguel Paulino
- Full member: João Bispo
- Full member: João Canas Ferreira
- Substitute member: Luís Manuel Pessoa

Release of results and prior hearing: the results of the selection process, as well as the terms and procedures for prior hearing, will be released to the applicants by email, under the terms referred to in Article 13 of the Regulations for Studentships and Fellowships of INESC TEC.

6. FORMALISATION OF APPLICATIONS:

Application Documents:

1. Motivation letter;
2. Curriculum Vitae (must include the list of previous fellowships, their type, beginning and end dates, funding entities and host institutions);
3. Certificate or diploma degree;

4. Proof of enrollment in a degree awarding study cycle or in a non degree awarding Higher Education program.
 - The proof of enrollment may be presented just during the grant hiring stage.
5. Signed declaration stating the infringement of the grant holder's duties (article 14, no. 4)
6. Documental evidence to support the country of residence, residence permit or other legally equivalent document, in cases where the applicant is a foreigner or non-resident in Portugal - valid until the beginning of the grant.
7. Other supporting documents relevant to the final assessment.

Failure to deliver the required documents within the 90-day period after the date of the notice of the conditional awarding of the grant implies its cancellation.

Application period: From 2025-07-24 to 2025-08-06

Submission of applications: the application will be formalised by submitting the form available in the *Work With Us* section of INESC TEC website.

7. BINDING LEGISLATION AND REGULATION

The hiring process shall comply with the current legislation regarding the Research Grant Holder Statute, approved by Law no. 40/2004 of August 18, in its current wording, as well as by the [Regulations for Grants of INESC TEC](#) and for [FCT Grants Regulation in force](#).

For more information, please check the [Regulations for Grants of INESC TEC](#) and relevant annexes at www.inesctec.pt/bolsas
